ANNUAL INDEX

VOLUME 46

1969

AUTHORS

A

Abe, Y. and Shuichi Osanai. Long-chain carboxylic acids containing ether linkage: III. The antibacterial and antifungal activities of the amine salts of some β-alkoxypropionic acids, 365
Ackman, R. G. See B. Drozdowski
Adler, R. R., T. B. Albin and B. M. Finger. Development of screening tests for hard surface cleaners: I. Artificial soil removal from linoleum surfaces, 520
Aftergood, Lilla. See Roslyn B. Alfin-Slater
Aggarwal, J. S. See N. G. Kulkarni
Ahearn, G. P. Surfactants for oil recovery, 540A
Albin, T. B. See R. R. Adler
Albrecht, W. J. See G. C. Mustakas
Albright, Lyle F. See Sava Stefanovic
Aldridge, M. H. See P. Neal
Alfin-Slater, Roslyn B., Lilla Aftergood, H. Joseph Hernandez, Elizabeth Stern and Daniel Melnick. Studies of long term administration of aflatoxin to rats as a natural food contaminant, 493
—— H. Hansen, R. S. Morris and D. Melnick. Dietary fat composition and tocopherol requirement: I. Lack of correlation between nutritional indices and results of *in vitro* peroxide hemolysis tests, 563
—— R. B. Morris, L. Aftergood and D. Melnick. Dietary fat composition and tocopherol requirement: II. Nutritional status of heated and unheated vegetable oils of different ratios of unsaturated fatty acids and vitamin E, 657
Allen, Robert R. A rapid method for the determination for *trans* unsaturation in fats and derivatives, 552
Anders, D. E. See E. H. Pryde
Anliker, R., H. Hefti and H. Kasperl. The use of optical brighteners for synthetic fibers in detergents, 75
—— H. Hefti, H. Kasperl and B. Milicevic. Some theoretical and practical aspects of polyester whitening from the wash bath, 523
Applewhite, T. H. See R. J. Horvat
Arai, Haruhiko and Koichiro Yoshizaki. The effect of water hardness on the solubilizing activity of linear alkylbenzene sulfonate, 544
Arit, H. G., Jr. See N. E. Hetman
Arya, S. S., S. Ramanujam and P. K. Vijayaraghavan. Refractive index as an objective method for evaluation of rancidity in edible oils and fats, 28

B

Babulak, S. W. See L. M. Paixao
Bailey, August V., James A. Harris and Evald L. Skau. Correlation of solubility data: III. The isopleth reference method for predicting solubility data for long chain homologous and analogous compounds, 583
Bandyopadhyay, C. See M. K. Kundu
Barkin, Stanley M. See Stuart D. Friedman
—— See L. M. Paixao
Beal, R. E. See L. T. Black
—— See K. J. Moulton
—— K. J. Moulton, H. A. Moser and L. T. Black. Removal of copper from hydrogenated soybean oil, 498
Beckwith, A. C. See L. Stoloff
Bender, J. R. See A. E. Rheineck
Benedict, J. H. See M. Mausner
Bentz, Alan P. and Barbara G. Breidenbach. Evaluation of the differential scanning calorimetric method for fat solids, 60
Bergseth, R. See A. E. Rheineck
Berry, James W. See Martin M. Schlosser
Bhattacharyya, D. See M. M. Chakrabarty
Bilyk, A., A. Eisner and G. Maerker. Nonvolatile α-branched chain fatty acid derivatives: IV. Addition of aryl ester to long chain olefins, 469
Bistline, R. G., Jr., F. D. Smith, J. K. Weil and A. J. Stirton. Hexitol and sucrose esters of α-sulfo fatty acids, 549
Bitner, E. D., V. L. Davison and H. J. Dutton. Integrated system for microreactor gas chromatography, 113
Black, L. T. See R. E. Beal
—— See G. C. Mustakas
—— and R. E. Beal. Determination of the Δ 15 double bond in fatty acids of hydrogenated soybean oil, 312
Bookwalter, G. N. See G. C. Mustakas
Booman, K. A. See M. Mausner
Braddock, R. J. and L. R. Dugan, Jr. Short communication re fatty acids of Lake Michigan Coho salmon, 428
Bradenhop, A. F. and W. F. Wilkens. The formation of 1-octen-3-ol in soybeans during soaking, 179
Bratcher, Sharon S., A. R. Kemmerer and D. D. Rubis. Oxidative stability of safflower oil, 173
Braunwarth, J. B. See H. L. Sanders
Breidenbach, Barbara G. See Alan P. Bentz
Brenner, T. E. See M. Mausner
Bringi, N. V. See M. G. Kasbekar
Brobst, Kenneth M. See Dennis D. Honnold
Brown, E. L. See Jay C. Harris
Brown, L. E. Methods for the determination of cyclopropenoid fatty acids: VIII. The HBr titration method applied to small samples, 654
Brown, R. F. Short communication re the effect of some mycotoxins on the brine shrimp, *Artemia salina*, 119
Budowski, P. Letter to the editor re cocoanut (*Theobroma nucifera*)?, 184
Buide, N. See J. A. Fioriti
Bullock, Anson B. See Richard N. McCoy
Butterfield, R. O. Countercurrent and counter double current distribution of 2-methoxyethyl and 2-chloroethyl fatty esters, 320
—— Kinetic rate constants determined by a digital computer, 429
—— See C. R. Scholfield
Buttkus, H. Reaction of cysteine and methionine with malonaldehyde, 88

C

Calhoun, Robert R., Jr. See Francis E. Luddy
Campbell, A. D. See P. Neal
—— See L. Stoloff
Campbell, T. C. and J. H. Snider. Noninterference of seed coat constituents of cotton seeds using the Pons and Goldblatt aflatoxin procedure, 31
Carson, R. B. See E. D. Putt
Cater, C. M. and C. M. Lyman. Reaction of gossypol with amino acids and other amino compounds, 649
Cayle, Theodore. Evaluation of enzymes for laundry products, 515
Chadha, R. K. See H. B. S. Conacher
—— See Madhu R. Sahasrabudhe
Chakrabarty, M. M., D. Bhattacharyya and M. K. Kundu. A simple photometric method for microdetermination of fatty acids in lipids, 473
Chand, Puran. See Wahid U. Malik
Chatterjee, P. C. See N. G. Kulkarni
Clark, S. P. Continuous extrusion cooking of cottonseed kernels and of partially defatted meal, 673
Coll, H. Osmometric study of commercial surfactants, 593
Conacher, H. B. S., R. K. Chadha and M. R. Sahasrabudhe. Determination of brominated vegetable oils in soft drinks by gas liquid chromatography, 558
Conway, R. A. See M. Mausner
Coppersmith, M. and R. C. Maggart. Monoethoxylation of hindered carboxylic acids, 332
Cowan, J. C. See L. E. Gast
—— See T. L. Mounts
—— See E. H. Pryde
Crabb, N. T. See H. R. Harless
Craig, B. M. See R. K. Downey
—— See E. D. Putt
Cronin, John T. See Carl M. Lyman
Crowe, P. F. and D. S. Spicer. Determination and application in GLC of semilog function of retention time and chain length: Effect of temperature variation on function, 5

D

Davis, Ernst M. and Earnest F. Gloyna. Anionic and nonionic surfactant sorption and degradation by algae cultures, 604
Davison, V. L. See E. D. Bitner
DeAcetis, W. See J. G. Moffett, Jr.
Deutschman, Archie J., Jr. See Martin M. Schlosser
Dixon, Glen J. See Robert W. Sidwell
Domsky, I. I. See M. B. Graber
Donahue, E. T. See H. E. Kenney
Donovan, D. T. Changes in hardware, 205
Downey, R. K., B. M. Craig and C. G. Youngs. Breeding rapeseed for oil and meal quality, 121
Drozdowski, B. and R. G. Ackman. Isopropyl alcohol extraction of oil and lipids in the production of fish protein concentrate from herring, 371
Dugan, L. R., Jr. See R. J. Braddock
Duthie, J. R. See M. Mausner
Dutton, H. J. See E. D. Bitner
—— See S. Koritala
—— See T. L. Mounts
—— See Ovidiu Popescu
—— See C. R. Scholfield
Dysleski, Cynthia A. See Dinesh O. Shah

E

Eapen, K. E., N. W. Tape and R. P. A. Sims. New process for the production of better quality rapeseed oil and meal: II. Detoxification and dehulling of rapeseeds—feasibility study, 52
Earle, F. R. See R. Kleiman
Eddy, C. Roland, Virginia G. Martin and John S. Showell. Uses of digital computers in theoretical analytical chemistry: III. Some computational experiments on irregularities in countercurrent distribution, 575
Eldridge, A. C. A bibliography on the solvent extraction of soybeans and soybean products, 1944-1968, 458A
Eisner, A. See A. Bilyk
Ellis, Edwin M. Salmonella reservoirs in animals and feeds, 227
Evans, C. D. See T. L. Mounts
—— G. R. List, R. L. Hoffmann and Helen A. Moser. Edible oil quality as measured by thermal release of pentane, 501
—— D. G. McConnell, G. R. List and C. R. Scholfield. Structures of unsaturated vegetable oil glycerides: Direct calculation from fatty acid composition, 421

F

Feuge, R. O., Zigrida Zarins, John L. White and Raiford L. Holmes. Titration of cyclopropene esters with hydrogen bromide, 185
Fineberg, H. See N. O. V. Sonntag
Fineman, I. G. A. Polarity index of surface-active ethylene oxide adducts, 296
Finger, B. M. See R. R. Adler
Fioriti, J. A., N. Buide and R. J. Sims. Analysis of lipids containing epoxy groups: The epoxy glycerides of *Vernonia anthelmintica* seed oil, 108
Firestone, D. See P. Neal
Fitko, C. See A. Ravve
Foglia, T. A. and G. Maerker. Heterocyclic compounds derived from aliphatic amines, 391
Foltz, V. D. Salmonella ecology, 222
Fordham, O. M., Jr. See L. Stoloff
Frankel, E. N., F. N. Frankel and F. L. Little. Homogeneous catalytic hydrogenation of unsaturated fats: Group VIB metal carbonyl complexes, 256
—— S. Metlin, W. K. Rohwedder and I. Wender. Hydroformylation of unsaturated fatty esters, 133
Frankel, F. N. See E. N. Frankel
Fredriksson, P.-O. See R. Marcuse
Freeberg, F. E. See W. J. Miller
Friedman, Stuart D. See L. M. Paixao
—— and Stanley M. Barkin. Enzymic activity of proteases in detergent systems: Comparison of assay methods and the role of interfering substances, 81
Fukuzumi, Kazuo and Nobuo Ikeda. Study on the effect of antioxidants in the autoxidation of methyl nonconjugated octadecadienoates, 64
Fuller, G. See R. J. Horvat

G

Gaddis, A. M. See W. I. Kimoto
Galton, Mildred M. Humans and pets as sources of salmonellae, 230
Garrison, L. J. See M. Mausner
Gast, L. E., Wilma J. Schneider, G. E. McManis and J. C. Cowan. Polyesteramides from linseed and soybean oils for protective coatings: Diisocyanate-modified polymers, 360
Gerahbein, Leon L. and Eric J. Singh. Hydrocarbons and alcohols of basking shark and pig liver lipids, 34
—— and Eric J. Singh. Hydrocarbons of dogfish and cod livers and herring oil, 554

SUBJECTS

A

Acetals, from methyl azelaaldehydate, 213
—— of polyaldehydes, reaction with polyols, 452, 455
Acetates, fatty, carriers in vacuum distillation of fatty methyl esters, 13
Acetic acid, p-methoxyphenyl-, methyl ester, addition to 1-decene, 469
—— phenyl-, methyl ester, addition to 1-decene, 469
—— p-tolyl, methyl ester, addition to 1-decene, 469
Acid decarboxylation, 615
Acids, amino, reaction with gossypol, 649
—— fatty cyclopropenoid, HBr titration method, 654
—— synthetic fatty, 194
Activity of enzymes, in laundry products, 515
Aflatoxin, anal in cottonseed, 31
—— bioassay using brine shrimp, 119
—— detection in cottonseed meal, 105
—— long term rat feeding studies, 493
—— sampling of shelled peanuts, 377
—— TLC of, 335
—— variability in sampling peanuts, 667, 678
Aflatoxin in cottonseed, ultraviolet screening, 39
Aflatoxins B, B_2, G and G_2, separation and purification, 149
Albumin, egg, oxidation rate of at moisture levels, 409
Alcohols, in basking shark liver oil, 34
—— by catalytic reduction of carboxylic acids, 118
—— fatty, ethylene oxide condensates, 289
—— fatty, from hydroformylation of unsaturated fatty esters, 133
—— linear, ethoxylated sulfates, osmotic studies, 593
—— in pig liver, 34
—— secondary, ethoxylated sulfates, osmotic studies, 593
—— synthetic fatty, 194
—— unsaturated fatty, by hydrogenation of unsaturated fatty acids, 155; 158; 163
Alcohol sulfates, high molecular weight, in detergent formulations, 441
Aldehyde oils, from ozonolysis of triglyceride oils, 452
Aldehydes, in autoxidation of lard, 403
—— fatty, from hydroformylation of unsaturated fatty esters, 133
—— fatty, from irradiation of vegetable oils, 387
—— from ozonolysis of triglyceride oils, 452
Algae sorption and degradation, of anionic and nonionic surfactants, 604
Alkoxyethyloxy propionic acids, and amine salts of, 365
β-Alkoxypropionic acid, amine salts, antibacterial action of, 365
Alkylbenzene sulfonate, linear, solubilizing activity in hard water, 544
Alkyl-12(2-carboalkoxyethoxy)-octadecanoates, 1
Amides, substituted, of decanoic acid, 249
Bis (8-carbomethoxyoctyl) Amine, 67
Amines, as oxidation retarders in fats, 262
—— sec. and tert. from methyl azelaaldehydate, 67
—— sec. and tert. from pelargonaldehyde, 67
Amino acids, reaction with gossypol, 649
Amylolytic enzymes, in detergents, 507
Analysis, aflatoxin, 31
—— of soybean oil for tocopherol, 339
—— TLC of sorbitan fatty acid esters, 8
—— for Vitamin E in food materials, 417
Analysis of proteolytic enzymes, in detergents, 511
Anilines, N-monoalkyl, 611
Antibacterial activity, of amine salts of β-alkoxypropionic acid, 365
Antibacterial agents, identification of by TLC, 529
—— for toilet soaps, 202
Antimicrobial activity, of N,N-disubstituted decanamides, 249
Antimony trichloride, in color test for pongam seed oil, 627
Antioxidant activity, effect of moisture in linoleate oxidation, 597
Antioxidants, effect on autoxidation of methyl nonconjugated octadecadienoates, 64
—— in low-oxygen pressure oxidation of linoleic acid, 262
—— moisture effect on during linoleate oxidation, 409
AOC. See α-olefin sulfonate
Arginine, reaction with cottonseed gossypol, 649
Artemia salina brine shrimp, in bioassay of aflatoxin, 119
Asparagine, reaction with cottonseed gossypol, 649
Aspartic acid, reaction with cottonseed gossypol, 649
Assay methods, for proteolytic enzymes in detergents, 81
Assay of proteolytic enzymes, in detergents, 511, 515
Atomic absorption, a quantitative method for dimethylpolysiloxanes from foods, 561
Autoxidation, of *cis,cis*-6,9-octadecadiene, mechanism, 273
—— of *cis,cis*-6,9-octadecadiene, volatile products, 273
—— **fats and oils,** measured by refractive index, 28
—— of isomers of methyl octadeca-9,12-dienoates, 64
—— of methyl linoleate, products, 94
Autoxidation of oils, decomp of 13-hydroperoxy-9,11-octadecadienoic acid, 501
Autoxidation, of lard, products and mechanism, 403
Azelaaldehydic methyl ester, reactions of, 213
Azelaoglycerides, from glyceride oxidation, separation of, 632

B

Barium coproate/water/propanol system, physical properties of, 588
Barium soap-water-propanol, surface tension, 152
Basking shark liver oil, comp, 34
Beef tallow, fatty comp, 620
Beeswax, alkyl esters, 189
—— comp, fatty alcohols and acids, 189
Behenic acid, solubility in acetone, methanol, toluene, ispropyl ether, 583
Bentonite, electrophoretic migration in phosphate solutions, 280
Benzo(α)pyrene, labeled, fate in soybean processing, 482
Benzylammonium quaternaries, as virucides, 532
Bibliography, solvent extraction of soybean products, 1944-1968, 458A
Bioassay, of aflatoxin B, using brine shrimp, 119
Biodegradability, of sodium *p*- [1-(n-nonylthio) ethyl] benzene sulfonate, 601
Biodegradability testing, of nonionic surfactants, 432
Biological treatment processes, of waste water, 344A
Biosynthesis, of fatty acids during corn growth, 485
Brassica seeds, genetic variation, 121
Brassidic acid, solubility in acetone, methanol, toluene, isopropyl ether, 583
Breeding in cottonseed, to reduce gossypol, 124
Breeding genetics, in rapeseed, 124
Breeding selection, in safflower oil quality and quantity, 130
—— in sunflower, fatty acid distribution, 126
Brine shrimp, bioassay of aflatoxin B, and ochratoxin A, 119
Brominated vegetable oils, dtmn by GLC, 558
Bromo(di)fatty methyl esters, partial dehydrobromination of, 464
Builders, role of in detergents and water softening, 544
3-Butenylisothiocyanate, in rapeseed meal as thioglucoside, 121
Butter oil, hydrogenated, spectral and physical properties, 489
—— hydrogenation of, 489
N-Butyldecanamide, 249

C

Cadmium oleate, catalyst in reduction of FA to unsaturated alcohol, 155, 163
Cadmium/silver oleate catalysts, in reduction of oleic acid to oleyl alcohol, 163
Calcium tripolyphosphate, film formation on glassware, 639
Calorimetric technique, for energy input in clothes washing, 299
Calorimetry, differential scanning, for solids dtmn in oils and fats, 341
Caproic acid barium salt/water/propanol system, physical properties of, 588
Carbon black, electrophoretic migration in phosphate solutions, 280
Carbon dioxide, in destruction of cyclopropenoid fatty acids in cottonseed meal, 305
Carbonyl products, from autoxidation of lard, 403
12-Carboxyethoxy octadecanoic acid, dibenzyl ester, 1
—— di-t-butyl ester, 1
—— di-*p*-cresyl ester, 1
—— dicyclobexyl ester, 1
—— didodecyl ester, 1
—— di (2,2,2-trifluoroethyl) ester, 1
—— di (4-heptyl) ester, 1
—— diheptyl ester, 1
—— dimethyl ester, 1
—— dineopentyl ester, 1
—— dioctadecyl ester, 1
—— diphenyl ester, 1
Carboxylic acids, containing ether linkages, antibacterial activity of amine salts of, 365
—— hindered, monoethoxylation of, 332
—— reduction to alcohols, 118
Carrier technique, in distillation of polyunsaturated fatty methyl esters, 13
Catalysis, in hydroformylation of unsaturated fatty esters, 133
Catalyst, copper chromite, in hydrogenation of soybean oil, 662
—— for hydrogenation of soybean oil to obtain high oleic oils, 97
Catalytic hydrogenation, homogeneous, of unsaturated fats, 256
Catotenoid changes, during maturing of peanut seeds, 629
CDCD. See counter double current distribution
Chelates, copper, of 2-hydroxydocosanoic acid, 365
—— of 2-hydroxystearate acid, 365 365
—— metal, of N-lauroylethylenediamide, 344
Chelation, by EDTA of metals, moisture effects, 597
Chemical activity, against viruses, 532
Chicken tissue, assay for gossypol and metabolites, 100
Chlorinated oleic acid, oxygenated polymeric byproducts, 85
Chlorination, of oleic acid, 85
2-Chloroethyl fatty esters, countercurrent distribution, 320
N-Chloro fatty amines, photolytic rearrangement to cyclic amines, 391
Chocolate, dark, phospholipid extraction, 425
—— viscosity related to phospholipid content, 425
Chromatography, improved AOCS neutral oil loss dtmn, 252
—— in separation of aflatoxins, 149
Chromatography, column, in anal of maleic anhydride-rosin adducts, 241
—— to concentrate aflatoxin fractions, 105
Chromatography, gas, (capillary) and mass spectrometry technique, 273
Chromatography, gas liquid, beeswax fatty fractions, 189
—— dtmn of brominated oils in soft drinks, 558
—— fatty methyl esters (saturated and unsaturated), temp variations, 5
—— preparative technique for 1-octen-3-ol, 179
—— temp effect on retention time fatty methyl esters, 5
—— in tocopherol anal, 417
—— of unsaturated fatty alcohol acetates, 191
Chromatography, thin-layer, aflatoxin anal, improved procedure, 31
—— in aflatoxin B, dtmn, 105
—— in aflatoxin dtmn, 335
—— for germicide identification, 529
—— of mixed glycerides, 447
—— in tocopherol anal, 417
Chromium tricarbonyl complexes, homogenous hydrogenation catalysts, 256
Clays, radioactive, for detergency studies, 537
Cleaners, hard surface, effectiveness measure by reflectance, 351
Cleaning efficiency, on hard surfaces, 520
—— synthetic soil removal from tile surface, 351
CMC. See critical micelle concentration
Coating films, from glyceride polyacetals, 455
Coating resins, urethanes from hydroxy polyacetals, 452
Cocoa butter, phospholipids, 425
Coconut oil, products from irradiation of, 387
Cod liver oil, hydrocarbon and fatty acid comp, 554
Coho salmon, Lake Michigan, fatty acid comp, 428
Colloidal particles, mobility in phosphate solutions, 280
Column chromatography. See chromatography, column
Computer, use in detergency testing, 70
Computer simulation, of countercurrent distribution, 575
Conductivity, of barium caproate/water/propanol system, 588
Cooking, extrusion, of cottonseed kernels and meal, 673
Copper, removal from hydrogenated soybean oil, 498
—— on Cab-O-Sil catalyst for hydrogenation of soybean oil, 97
Copper chelates, of 2-hydroxystearic and 2-hydroxydocosanoic acids, 365
Copper chromite, in selective hydrogenation of soybean oil, 245
Copper-containing catalysts, in hydrogenation of soybean oil, 662
Copper oleate, catalyst in reduction of FA to unsaturated alcohol, 156; 163
Corn, maturing, lipid and fatty acid changes, 485
Corn oil, brominated, methanolysis and GLC anal of, 558
—— products from irradiation of, 387
Cottonseed, extrusion cooking of kernels and meal, 673
—— gossypol aldehyde reaction with amino acids, 649
—— screening for aflatoxin by UV light, 39

Cottonseed flakes, prep before solvent extraction, 380
Cottonseed flour, free gossypol reduction in extrusion cooking, 673
—— full fat, by extrusion cooking, 673
Cottonseed meal, aflatoxin B, detection, 105
—— destruction of cyclopropenoid fatty acids in, 305
Cottonseed oil, brominated, methanolysis and GLC anal of, 558
—— nickel catalysts in partial hydrogenation, 139
Cottonseed protein products, drying, 184A
Cottonseed storage, temp effect on rate of deterioration, 303
Countercurrent distribution, nonideal operation, computer simulation, 575
Counter double current distribution, of fatty acid esters, 320
Critical micelle concentration, foam testing, 399
Cyanates, metal, in dehydrobromination of dibromo fatty esters, 464
Cyanatide, a cyano fatty di-lipid, 23
Cyano, containing lipid fraction, kusum oil, 23
Cyanogenic compounds, from kusum oil, 23
N-Cyclohexyldecanamide, 249
Cyclopropene esters, HBr titration, 185
Cyclopropene fatty acids of cottonseed, destruction by visible light, 609
Cyclopropenoid fatty acid esters, 171
Clycopropenoid fatty acids, in cottonseed meal, inactivation of, 305
—— HBr titration method, 654
Cysteine, reaction with malonaldehyde, 88

D

Dairy products, imitation, 58A
N,N-Bis(2-decanoyloxyethyl)Decanamide, 249
N,N-Bis(2-ethoxyethyl)Decanamide, 249
Decanamides, substituted, antimicrobial and physical characteristics, 249
Decane, 1,10-divinyloxy-, 1,10-diacryloxy-, and 1,10-dimethacryloxy-, 396
neo-Decanoic acid, monoethoxylation of, 332
Decanoic acid/decanol in monolayers, physical chemistry of, 645
N-Decanoyl-3-azabicyclo[3.2.2]nonane, 249
N-Decanoyl-2-benzylpiperidine, 249
N-Decanoyl-4-benzylpiperidine, 249
N-Decanoyl-2, 6-dimethylmorpholine, 249
N-Decanoyl-2,6-dimethylpiperidine, 249
N-Decanoyl-4-ethylpiperidine, 249
N-Decanoylhexamethylenimine, 249
N-Decanoyl-2-methyl-5-ethylpiperidine, 249
N-Decanoyl-2-methylpiperidine, 249
N-Decanoyl-3-methylpiperidine, 249
N-Decanoyl-4-methylpiperidine, 249
N-Decanoyl-N′-methylpiperazine, 249
N-Decanoylmorpholine, 249
N-Decanoylpiperidine, 249
N-Decanoyl-4-nonylpiperidine, 249
N-Decanoyl-2-(5-nonyl)piperidine, 249
N,N-Di-Decanoylpiperazine, 249
N-Decanoyl-1,2,3,4-tetrahydroquinoline, 249
Decarboxylation of organic acids, peroxide initiated, 615
1-Decene, addition of aryl esters of, 469
Decyl sulfoacetate, sodium salt, 579
Degradation of nonionic surfactants, sludge and river tests, 432
Degradation of surfactants, by algae, 604
Dehydrobromination, of methyl dibromostearate, 464
Density, of barium caproate/water/propanol system, 588
Deodorant fabric softeners, fatty quaternary salts of phenolic germicides, 348
Desolventizing, of cotton seed flakes, superheated steam, 380
Detergency, of alcohol sulfate containing detergents, 441
—— of sodium *p*-[1-(n-nonylthio) ethyl] benzene sulfonate, 601
Detergency efficiency, test by soil removal, 351
Detergency studies, use of radioactive clays, 537
Detergency testing, using reflectance and computer calculations, 70
Detergent Additives, Symposium, beginning on page 507
Detergent and soap raw materials, fatty acids and alcohols, 194
Detergent concentrations, in hard water, residual film formation, 639
Detergent contribution, to washing systems, 299
Detergent formulations, effect on new textile materials, 199
Detergent properties, of sodium alkyl sulfoacetates, 579
Detergents, assay methods for proteolytic enzymes, 81
—— based on α-olefin sulfonate, 208
—— biodegradability of nonionic surfactants, 432
—— containing high molecular weight alcohol sulfates, 441
—— containing optical brighteners for synthetic fibers, 75
—— containing proteolytic and amylolytic enzymes, 507, 511, 515
Detergents II The Next Phase: Textiles and Detergents of the '70's, Symposium, beginning on page 194
Detergent solubilization, effect of water hardness, 544
Detergent yellowing testing, 199
Detoxification, of rapeseed meal by aqueous extraction, 52
Deuteroperchloric acid, in conversion of oleic acid to γ-stearolactone, 479
1,10-Diacryloxydecane, 396
1,12-Diacryloxyoctadecane, 396
1,10-Diallyloxydecane, 396
Diazelains, separation from glyceride oxidation mixtures, 632
Dibromo, vicinyl, fatty derivatives, dehydrobromination of, 464
3,5-Dibromo-3′-trifluoromethylsalicylanilide, identification of by TLC, 529
9,10-Dichlorostearic acid, 85
4,4′-Dichloro-3-trifluoromethylcarbanilide, identification of by TLC, 529
9,10:12,13-Diepoxystearic acid, methyl ester, 327
Differential scanning calorimetry, fats solids method compared with NMR, SFI, 60
—— heat of fusion of triglycerides, 143
—— measure of solids in fats, 341
—— method for fat solids, 60
Differential thermal analysis, of copper chromium catalysts, 662
—— of lard triglycerides, 385
—— in milk fat heat capacity, 49
N,N-Dihydroxy laurylamine, 167
Diisocyanate, modified polyesteramides for coatings, 360
1,10-Dimethacryloxydecane, 396
1,12-Dimethacryloxyoctadecane, 396
2α-[2′(m-isopropylphenyl)ethyl] 1β,3α-Dimethylcyclohexane carboxylic acids, 633
N,N′-Dimethyl-1,9-nonanediamine, 391
Dimethylpolysiloxanes, isolation from fatty foods and anal, 561
Dinonylamine, 67
Dispenser, washing machine, for detergent and softeners, 205
Dispersing power, of N-lauroylethylethylenediamine metal chelates, 344
Distillation, fatty methyl esters, 13
Distribution of aflatoxin, in peanuts, 667, 678
Distribution ratios, in countercurrent distribution, 575
1,10-Divinyloxydecane, 396
1,12-Divinyloxyoctadecane, 396
Divinyl sebacate, 396
Dodecanoate, α-aryl-, esters by addition of aryl esters to 1-decene, 469
Dodecenyl acetates, GLC of geometric isomers, 191
Dodecylbenzenesulfonate, wash test with protein containing synthetic soil, 357
Dodecyl sulfoacetate, sodium salt, 579
Dodecyltrimethylammonium bromide, anal in presence of alcohol sulfate, 272
Dogfish liver oil, hydrocarbon and fatty acid comp, 554
Δ^{15}Double bond, in fatty acids, quantitative method, 312
Drying Oils and Paint, Symposium, beginning on page 447
Drying process, for moist oilseed products, 183A
DSC. See differential scanning calorimeter
DTA. See differential thermal analysis

E

Edible oil quality, measured by pentane release, 501
Elaidic acid, solubility in acetone, methanol, toluene, isopropyl ether, 583
Electrolytes, effect of suspension stability of solid particles, 571
Electrophoretic mobility, of colloids in phosphate solutions, 280
^{14}C-Endrin, fate in soybean processing, 482
Enzymes, proteolytic and amylolytic, in detergents, 507, 511, 515
—— proteolytic, in detergents, assay methods, 81
Epoxidation, kinetics of 9,10:12,13-diepoxystearic acid, methyl ester, 327
—— of methyl undecylenate, 459
trans-2,3-Epoxyoctanoic acid, from autoxidation of methyl linolenate, 94
12,13-Epoxyoleic acid methyl ester, epoxidation of, 327
Equipment, small scale for chemical reactions, 118
Erucic acid, solubility in acetone, methanol, toluene, isopropyl ether, 583
Esters, wax, from sunflower oil, 505
Ethoxylates, of hindered carboxylic acids, 332
Ethoxylation, of fatty amines, 167
—— of hindered carboxylic acids, 332
Ethyl-N-cyclohexylaminomethyl stearate, 611
Ethylenediamine, N-lauroyl, properties of metal chelates, 344
Ethylene oxide, addition to fatty amines, 167
—— adducts of fatty amines, 296
—— fatty alcohol condensates, 289
2-Ethylhexanoic acid, monoethoxylation of, 332
Ethyl-N-phenylaminomethyl stearate, 611
Extraction, solvent, of soybeans, 1944–1968 bibliography, 458A
Extraction of lipids, from herring, 371
Extrusion cooking, of cottonseed kernels and meal, 673

F

Fabric detergency testing, using reflectance and computer, 70
Fabric softeners, deodorant, fatty quaternary salts of phenolic germicides, 348
Fabric treatment, with virucidal chemicals, 532
Fats, hydrogenation using homogeneous catalyst complexes, 256
—— milk, heat capacity by DTA, 49
—— percent solids by differential scanning calorimeter, 60
—— unsaturated, hydrogenation using homogeneous catalyst complexes, 256
—— *trans*-unsaturation, by infrared absorption, 552
Fats and oils, irradiation of, 387
Fat solids, dtmn by DSC, 60
Fatty acid/alcohol mixture, in monolayer, 645
Fatty acid barium salts, surface tension in water/propanol, 152
Fatty acid chloride, catalytic hydrogenation to aldehydes, 277
Fatty acid composition, basis for calculation of triglyceride structure, 421
—— of beef tallow, 620
—— fish lipids by IPA extraction of herring, 371
—— of germinating peanuts, effect of growth regulators, 41
—— sicklepod leaves and stem, 47
Fatty acid distribution, in sunflower varieties, 126
Fatty acid isomers, rates of reduction by hydrazine, 323
Fatty acid and lipid changes, during maturing of corn, 485
Fatty acid methyl esters, high vacuum fractional distillation, 13
Fatty acids, in destruction of cyclopropenoid fatty acids in cottonseed meal, 305
—— (esters), N-phenylaminomethylation of, 611
—— in Lake Michigan coho salmon, 428
—— linseed, 2-chloroethyl esters, 320
—— safflower, 2-methoxyethyl esters, 320
—— from sunflower wax esters, 505
Fatty acids, cyclopropenoid, destruction by visible light, 609
—— in destruction of in cottonseed meal, 305
—— HBr titration method, 654
Fatty acids free, dtmn of in vegetable oils, 473
—— of stored cottonseed, temp effect on, 303
Fatty acids, α-sulfo, hexitol and sucrose esters, 549
Fatty acids, synthetic, new development, 4A
—— by oxidation naphthenic hydrocarbons, 4A
—— by oxidation of paraffin hydrocarbons, 4A
Fatty acids, unsaturated, hydroperoxides, decomp of, 501
—— permanganate oxidation of, 685
—— ratios in vegetable oils, 421
Fatty acid solubility, in solvents by the isopleth reference method, 583
Fatty alcohol acetates, GLC, 191
—— carriers in vacuum distillation of fatty methyl esters, 13
Fatty alcohols, ethylene oxide condensates, 289
—— from sunflower wax esters, 505
—— unsaturated, by hydrogenation with cu/cd oleates, 155; 158; 163
Fatty aldehydes, unsaturated, synthesis from acid chlorides, 277
Fatty amide, N-bishydroxyethyl, reaction with dibasic acid, 280
Fatty amines, ethylene oxide adducts, polarity index of, 296
Fatty methyl esters, temp effect on retention time, 5
Fatty trimethylammonium salts, of phenolic germicides, 348
Feeding studies, rats, effect of aflatoxins, 493
Fiber prebrightening, with optical brighteners, 75
Fibers, synthetic, treated with optical brighteners, 75
Films, coating, from polyacetals from oils, 455
—— on glassware, from detergent washing, 639
Fish phospholipids, from herring, 371
Fish protein concentrate, herring, by isopropyl alcohol extraction, 371
Flour, cottonseed, free gossypol reduction in extrusion cooking, 673
—— cottonseed, full fat, by extrusion cooking, 673
—— soy, full fat, lipoxidase deactivation by heat treatments, 623
Fluorescence, in screening cottonseed for aflatoxin, 39
Fluorescent whitening agents, for polyesters, 523
Foam stability, of fatty acid/alcohol mixtures in monolayers, 645

Foam testing, factors in foam height, Ross-Miles test, 399
Foods, fatty, isolation of dimethylpolysiloxanes from, 561
Free fatty acids, in stored cottonseed, temp effect on, 303
Fungicidal activity, of amine salts of β-alkoxypropionic acid, 365

G

Gas-liquid chromatography. See chromatography, gas-liquid
Genetic selection, in rapeseed (*Brassica*) improvement, 121
—— in safflower oil quality and quantity, 130
—— in sunflower, fatty acid distribution, 126
Germicides, identification by TLC, 529
—— phenolic, fatty ammonium quaternary salts as deodorant fabric softener, 348
Gibberelic acid, effect on peanut germination, 176
Glandless cottonseed, by plant genetics, 124
GLC. See chromatography, gas-liquid
G-Glucitol, fatty acid esters, 8
Glutamic acid, reaction with cottonseed gossypol, 649
Glutamine, reaction with cottonseed gossypol, 649
Glutathione, in destruction of cyclopropenoid fatty acids in cottonseed meal, 305
Glyceride distribution, in glycerolysis of linseed oil, 447
Glyceride structure, statistical prediction from FA anal, 421
Glycine, reaction with cottonseed gossypol, 649
Gossypol, free, reduction of by extrusion cooking of cottonseed, 673
—— C_{14} labeled, 100
—— reactions with amino acids, 649
Gossypol metabolism, in the chick, 100
Gossypol reduction, in cottonseed by plant breeding, 124
Growth regulators, effect on FA comp of germinating peanuts, 41
—— on peanut germination, 176

H

Hard surface cleaners, linoleums as test substrate, 520
Hard water, in film formation on glassware, 639
HBr, analytical reagent for cyclopropenoid fatty acids, 654
Heat capacity, of milk fat, 49
Heat deactivation, of lipoxidase in soy flour, 623
Heat of fusion, triglycerides by differential scanning calorimetry, 143
Heat treatment, method to kill salmonella, 233
Hematite slurries, effect of surfactants on, 642
Hemolysis in rats, related to tocopherol levels, 563
Heptadecanoic acid, solubility in acetone, methanol, toluene, isopropyl ether, 583
Heptadecyl iodide, from stearic acid, 615
Herring, fish protein concentrate by isopropyl alcohol extraction, 371
Herring oil, hydrocarbon and fatty acid comp, 554
Hexachlorophene, fatty ammonium quaternary as deodorant fabric softener, 348
—— identification of by TLC, 529
Hexadecenyl acetates, GLC of geometric isomers, 191
Hexadecylamine, N-methyl, N-chloro, 391
Hexadecyltrimethylammonium bromide, anal in presence of alcohol sulfate surfactant, 272
Hexanoic acid, 2-ethyl, acid, monoethoxylation of, 332
Hexitol esters, of α-sulfopalmitate and α-sulfostearate, 549
Hindered carboxylic acid, monoethoxylation of, 332
Histidine-metal complexes, water effects in linoleate oxidation, 597
Hydrazine, fatty acid reduction by, 323
Hydrocarbons, in fish oils, 554
—— from irradiation of vegetable oils, 387
—— oxidation of, to give synthetic fatty acids, 4A
—— in shark liver oil and pig liver lipids, 34
Hydroformylation, of unsaturated fatty esters, 133
—— of unsaturated vegetable oils, 133
Hydrogenated soybean oil, removal of copper, 498
Hydrogenation, of butter oil, 489
—— of double bonds, kinetic rate constants, 429
—— partial, of cottonseed and soybean oil, 139
—— selective, of soybean oil, 97
—— of soybean oil with copper-chromium catalysts, 662
—— of soybean oil, isomer distribution, 245
—— of unsaturated fats, homogenous catalyst, 256
—— of unsaturated fatty acids to unsaturated fatty alcohols, 155; 158; 163
Hydrogenolysis, of carboxylic acids, 118
Hydroperoxide, decomp mechanism, autoxidized lard, 403
—— decomp to pentane, a measure of oil stability, 501
6-Hydroperoxy-7,9-octadecadiene, autoxidation cleavage, 273
9-Hydroperoxy-7,9-octadecadiene, autoxidation cleavage, 273
Hydrophilic-lipophilic balance, of EO adducts, 296
2-Hydroxydocosanoic acid chelates, physicochemical studies, 365
Hydroxy polyacetals, reaction with isocyanates, 452
12-Hydroxystearic acid, derivatives, 1
2-Hydroxystearic acid chelates, physico-chemical studies, 365

I

Imitation dairy products, review, 58A
Infrared absorption, for *trans*-unsaturation in fats, 552
Inhibitors, effect in low oxygen pressure oxidation of linoleic acid, 262
Iodides, alkyl or aryl, by peroxide decarboxylation of acids in presence of T_2, 615
Ion exchange, removal of copper from hydrogenated soybean oil, 498
Irradiation, of vegetable oils, products from, 387
Isanic acid, catalyzed alkylation of phenol, 315
Isanolic acid, catalyzed alkylation of phenol, 315
Isano oil, alkylation of phenol, 315
N-Isoamyldecanamide, 249
Isocyanates, di-, in urethane polyesteramide resins, for coating resins, 360
Isolation of lipids, method and example review, 145
Isomer distribution, in fatty acids of selective hydrogenation of soybean oil, 245
Isomerization, oil hydrogenation with sulfurized nickel catalysts, 139
—— of oleic acid, 479
8,15-Isopimaradien-18-oic acid, from tall oil fatty acids, 633
Isopleth reference method, for solubility predictions, 583
Isosorbide, from saponification of sorbitan esters, 381

K

Kaolinite clay (radioactive), in detergency studies, 537
Kinetic rate constants, by computer, 429
Kusum oil, comp, 23
—— sources of β-methyl α-tetronic acid, 183

L

Lactic acid, in destruction of cyclopropenoid fatty acids in cottonseed meal, 305
Lard, autoxidized, products and mechanism, 403
—— triglycerides comp by DTA, 385
Laundering equipment, 205
Laundry products, evaluation of enzyme activity, 515
N,N-Bis(2-decanoyloxyethyl)Lauramide, 249
N,N-Bis(2-hydroxyethyl)Lauramide, 249
N-Lauroylethylenediamine, properties of metal chelates, 344
Laurylamine, ethoxylation of, 167
Laurylsulfonate, in foam testing, 399
Lauryl N, N, N, -tris (hydroxylethyl) ammonium hydroxide quaternary, 167
Levopimaric acid—maleic anhydride adducts, 241
Light destruction, of cyclopropene fatty acids, 609
Lignosulfonate, as dispersant in hematite slurries, 642
Linolealdehyde, synthesis from acid chloride, 277
Linoleic acid, methyl ester, autoxidation products, 94
Linolenate, selective hydrogenation of, 662
Linolenate hydrogenation, kinetic rate constants for, 429
Linoleum, test substrate for hard surface cleaners, 520
Linseed oil, brominated, -HBr yielding halogenated drying oil, 464
—— glycerolysis of, 447
—— in urethane polyesteramide resins, for coating resins, 360
Lipase activity, assay, 176
—— growth regulator effect in peanut germination, 176
Lipid and fatty acid compositions, of maturing corn, 485
Lipid fractions, from IPA extraction of fish (herring), 371
Lipid isolation, method and example review, 145
Lipid synthesis, method and example review, 145
Lipoxidase deactivation, in soy flour by heat treatments, 623
Lithium tri-tert-butoxyhydroaluminate, catalyst in acid chloride to aldehyde, 277
Lysine, reaction with cottonseed gossypol, 649

M

Maleic anhydride—rosin adducts, anal for bound MA, 241
Maleic hydrazide, effect of peanut germination, 176
Malonaldehyde, reaction with cysteine and methionine, 88
Malvalic acid, analytical methods and prep, 185
Malvalic acid and esters, HBr titration method, 654
Mannitol esters, of α-sulfopalmitate and α-sulfostearate, 549
Mass spectrometric studies of nonyphenol, ethylene oxide adducts, 238
Meal, cottonseed, aflatoxin B, detection, 105
—— rapeseed, aqueous extraction, 52
—— rapeseed, detoxification by aqueous extraction, 52
3-Mercaptopropionic acid, in destruction of cyclopropenoid fatty acids in cottonseed meal, 305
Metal carbonyl (VIB) complexes, catalysts in hydrogenation, 256
Metal catalysts, effect of moisture in linoleate oxidation, 597
Metal chelates, copper, of 2-hydroxystearic and 2-hydroxydocosanoic acids, 365
Metal chloride chelates, of N-lauroylethylenediamine, 344
Metal nitrate chelates, of N-lauroylethylenediamine, 344
Metals, trace, effect of hydration on rate of oxidation of linoleate, 409
Metal sulfate chelates, of N-lauroylethylenediamine, 344
Metallic salts, catalysts in hydrogenation to obtain unsaturated fatty alcohol, 155; 158; 163
Bis-(2-N-methylpyrrolidinyl)Methane, 391
Methionine, reaction with malonaldehyde, 88
2-Methoxyethyl fatty esters, countercurrent distribution, 320
Methyl azelaaldehydate, general reactions of, 213
—— mono- and polyol acetals, 213
—— reductive alkylation of ammonia by, 67
N-Methyl-2-dodecylpyrrolidine, 391
2,2"-Methylenebis (trans-3,5-dimethoxystilbene, 569
Methyl-7-(2-N-methylpyrrolidinyl) heptanoate, 391
Methyl linoleate, autoxidation products, 94
Methyl sorbate, hydrogenation with metal (VIB) carbonyl complexes, 256
Methyl sterculate, synthesis, 171
N-Methyl-2-tetradecylpyrrolidine, 391
β-Methyl α-tetronic acid, from kusum oil, 183
Methyl undecylenate, epoxidation of, 459
Methyl vernolate, epoxidation of, 327
Micellar weights, of surfactants by membrane osmometry, 593
Micelle concentration, surfactants, by polarography and spectrophotometry, 285
Micromethod, photometric, for fatty acids in lipids, 473
Microreactor, for chemical reactions, 113
Milk fat, heat capacity by DTA, 49
Modification of Oilseeds Through Plant Breeding, Symposium, beginning on page 121
Moisture, effect on oxidation rate of linoleate, 409
Moisture reduction, in cottonseed flakes before solvent extraction, 380
Molybdenum tricarbonyl complexes, homogeneous hydrogenation catalysts, 256
Monolayer effects, of mixed fatty acid and alcohol, 645
Myristyl sulfoacetate, sodium salt, 579

N

Neutral oil determination, modification of AOCS chromatographic method, 252
Nickel catalysts, partial hydrogenation of cottonseed and soybean oil, 139
NMR. See nuclear magnetic resonance
Nonionic surfactants, biodegradability testing of, 432
—— containing polysiloxanes, 635
—— critical micelle conc dtmn, 285
Nonylphenol, ethoxylated, wash test with protein containing synthetic soil, 357
Nonylphenol-ethylene oxide adducts, mass spectral studies, 238
Nonylphenoxypoly(oxyethylene)ethanol, mass spectral studies, 238
Nuclear magnetic resonance, in anal of isano oil alkylation of phenol, 315
Nuts, sample selection for aflatoxin, 878

O

Ochratoxin A, bioassay using brine shrimp, 119
Octadecadiene, *cis, cis*-6,9: autoxidation, 273

Octadecadienoic acid, *11-cis, 15-cis* and *10-cis, 15-cis,* 269
10-cis, 15-cis-Octadecadienoic acid, 269
11-Cis, 15-cis-Octadecadienoic acid, 269
11,15-Octadecadienoic acid, isolated from beef and mutton tallow, 620
cis-9, cis-12-Octadecadienoic acid, methyl ester autoxidation, 64
Trans-9, trans-12-Octadecadienoic acid, methyl ester, autoxidation, 64
Octadecadienoic acid isomers, reduction rates with hydrazine, 323
Octadecadienoic acid (non-conjugated), methyl ester antioxidants in autoxidation, 64
Octadecane, 1,2-divinyloxy-, 1,12-diacryloxy-, and 1,2-dimethacryloxy, 396
Octadecanoic acid, 12-(2-carboxyethoxy) di esters, 1
—— 12-β-cyanoethoxy, methyl ester, 1
Octadecenoic acid isomers, reduction rates with hydrazine, 323
cis,12,13-epoxy-cis-9-Octadecenoic acid and glycerides, 108
Octadecylamine, N-methyl, N-chloro, 391
1-Octen-3-ol, formation during soaking of soybeans, 179
Octyl sulfoacetate, sodium salt, 579
Oil composition, calculated from FA comp, 421
Oils, butter, hydrogenation of, 489
Oils, coconut, products from irradiation of, 387
Oils, cod liver, hydrocarbon and fatty acid comp, 554
Oils, corn, brominated, methanolysis and GLC anal of, 558
—— products from irradiation of, 387
Oils, cottonseed, brominated, methanolysis and GLC anal of, 558
—— nickel catalysts in partial hydrogenation, 139
Oils, dogfish liver, hydrocarbon and fatty acid comp, 554
Oils, herring, hydrocarbon and fatty acid comp, 554
Oils, isano, alkylation of phenol, 315
Oils, kusum, comp, 23
—— source of β-methyl α-tetronic acid, 183
Oils, linseed, brominated, -HBr yielding halogenated drying oil, 464
—— glycerolysis of, 447
—— in urethane polyesteramide resins, for coating resins, 360
Oils, oleic, from hydrogenation of soybean oil, 97
Oils, olive, products from irradiation of, 387
—— brominated, methanolysis and GLC anal of, 558
Oils, peanut, changes during maturing of seed, 629
—— fatty acid distribution, 476
—— phosphatides, chromatographic separation of, 476
Oils, pongam seed, color test for, 627
—— detection in mixtures of oils, 627
Oils, safflower, high oleic, oxidative stability, 173
—— oxidative stability, 173
—— products from irradiation of, 387
Oils, sesame, brominated, methanolysis and GLC anal of, 558
Oils, shark liver, hydrocarbons and alcohols in, 34
Oils, soybean, anal of Δ^{15} content in partially hydrogenated, 312
—— deodorized, method of tocopherol anal, 339
—— hydrogenated, removal of copper from, 498
—— hydrogenation, with copper-chromium catalysts, 562
—— hydrogenation to high oleic oils, 97
—— methyl ester, hydrogenation with homogeneous catalyst complexes, 256
—— nickel catalysts in partial hydrogenation, 139
—— partial hydrogenation, isomer distribution, 245
—— N-phenylaminomethylated, 611
—— products from irradiation of, 387
—— γ-tocopherol derivatives, 18
—— in urethane polyesteramide resins, for coatings resins, 360
Oils, vegetable, brominated, dtmn by GLC, 558
—— dietary Vitamin E levels for rats, 657
Oil well flooding, with surfactants, oil recovery, 540A
Olealdehyde, synthesis from acid chloride, 277
Oleates, copper and cadmium, in hydrogenation to unsaturated fatty alcohols, 155; 158; 163
α-Olefin sulfonate, as detergent base, 208
—— detergent properties, 208
Oleic acid, brominated, methyl ester, dehydrobromination of, 464
—— chlorination of, 85
—— conversion to γ-stearolactone, 479
—— hydrogenation to oleyl alcohol, 158
Oleic oils, from hydrogenation of soybean oil, 97
Oleyl alcohol, by catalytic reduction of oleic acid, 155
Oleylamine, 9(10)-chloro-10(9)-hydroxy-N-methyl, 391
—— N-methyl, 391
Olive oil, brominated, methanolysis and GLC anal of, 558
—— products from irradiation of, 387
Optical brighteners, chemical structure classes, 75
—— in detergents, effects on synthetic fibers, 75
Ornithine, reaction with cottonseed gossypol, 649
Osmotic pressure studies, of surfactants, 593
Overoxidation, permanganate, of unsaturated fatty acids, 685
Oxidation, of linoleate, effect of moisture and protein level, 409
—— of linoleate, water effects on catalysts and antioxidants, 597
—— of linoleic acid, effect of antioxidants, 262
—— of linoleic acid, effect of low oxygen pressure, 262
—— permanganate, of unsaturated fatty acids, 685
—— of triglycerides, separation of azelaoglycerides, 632
Oxidative stability, safflower oil, 173
Oxo reaction, with unsaturated fatty esters and oils, 133
Oxyethylene distribution, in primary alcohol adducts, 289
Oxygen, low pressure, effect of antioxidants on oxidation of linoleic acid, 262
Ozonolysis, as tool in unsaturated fatty acid identification, 620

P

Palmitic, α-sulfo-, hexitol and sucrose esters, 549
Palmitic acid, solubility in acetone, methanol, toluene, isopropyl ether, 583
Palmitylsulfonate, in foam testing, 399
Partially hydrogenated soybean oil, 97
Particle suspensions, effects of electrolytes, 571
Partition coefficients, 2-methoxyethyl and 2-chloroethyl esters of FA, 320
Peanut germination, lipase activity during, 176
Peanut oil, changes during maturing of seed, 629
—— fatty acid distribution, 476
—— phosphatides, chromatographic separation of, 476
Peanuts, FA comp during germination, 41
—— shelled, sampling for aflatoxin, 377
—— variability of sampling for aflatoxin, 667, 678
Peanut seeds, carotenoid and oil content during maturation, 629
Pelargonaldehyde, reductive alkylation of ammonia by, 67
Pentane from fatty acid hydroperoxides, measure of oil stability, 501
neo-Pentanoic acid, monoethoxylation of, 332
Pentachlorophenol, fatty ammonium quaternary as deodorant fabric softener, 348
4-Pentenylisothiocyanate, in rapeseed meal as thioglucoside, 121
Peracetic acid, epoxidation of methyl 12,13-epoxyoleate, 327
Permanganate oxidation, of unsaturated fatty acids, 685
Peroxide induced decarboxylation, with iodine to give alkyl or aryl iodides, 615
Petroleum oil recovery, using surfactants, 540A
Petroselaidic acid, solubility in acetone, methanol, toluene, isopropyl ether, 583
Petroselinic acid, solubility in acetone, methanol, toluene, isopropyl ether, 583
Phenol, alkylation with isano oil, 315
N-Phenylaminomethylation, of unsaturated fatty material, 611
Phosphate solutions, electrophoretic mobility of colloids in, 280
Phosphates, effect of T_1O_2 and ferric oxide suspensions, 571
—— tripoly, role in hard water film formation on glassware, 639
Phosphatides, in peanut oil, fatty acid comp, 476
Phospholipids, in chocolate, extraction, 425
—— extraction from fish by isopropyl alcohol, 371
Photometric method, for fatty acids in lipids, 473
Physiological tests, rats, vegetable oils/vitamin E diets, 657
Pig liver lipids, hydrocarbons and alcohols in, 34
8,15-Pimaradien-18-oic acid, from tall oil fatty acids, 633
Pivalic acid, monoethoxylation of, 332
Polarity index, of ethylene oxide adducts of amines and alcohols, 296
—— of fatty amine ethylene oxide condensates, 296
Polarographic method, for micelle conc in surfactants, 285
Poly (amide-acetals), from methyl azelaaldehydate, 213
Poly (ester-acetals), from methyl azelaaldehydate, 213
Polyamides, from methyl azelaaldehydate, 213
Polyesteramides, hydroxy terminated, from linseed and soybean oils, 360
Polyesters, from methyl aazelaaldehydate, 213
Polyester whitening, with fluorescent agents, 523
Polymers, from oil, dibasic acid, diethanolamine and diisocyanate, for coatings, 360
Polyol, reaction with triglyceraldehydes, 452
—— resinous, reaction with triglyceraldehydes, 455
Polysilane, dimethyl, in nonionic surfactants, 635
Polysiloxanes, in nonionic surfactants, 635
Polyunsaturated fats, and tocopherol ratios in rat diets, 563
Polyunsaturated fatty acid methyl esters, fractional distillation, 13
Pongam seed oil, color test for, 627
—— detection in mixtures of oils, 627
Pristane, in dogfish, cod and herring oils, 554
Processing of cottonseed, better quality and color, 380
Propionaldehyde, quantitative, in anal of Δ^{15} unsaturated FA, 312
Propionic acid, dodecyloxy- and dodecyloxyethyloxy-, 365
—— tetradecyloxy- and tetradecyloxyethyloxy, 365
Protein, as component in synthetic soil for washing tests, 357
—— effect on oxidation rate of linoleate, 409
Protein products, cottonseed, drying of, 184A
Proteolytic enzymes, in detergents, 507, 511, 515
—— in detergents, assay methods, 81

Q

Quaternary, fatty, of pentachlorophenol and hexachlorophene, 348
Quaternary compounds, benzyl, as virucides, 532
Quaternary germicides, as fabric softeners, 348
Quaternary surfactants, dtmn of in presence of alcohol sulfate surfactant, 272

R

Radiation, ionizing, effect on vegetable fats, 387
Radioactive clays, for detergency studies, 537
Radiochemical experiments, on soybean oil minor constituents, 482
Rancidity, edible oils and fats, 28
Rapeseed, genetic modification, 121
Rapeseed meal, aqueous extraction, 52
—— detoxification by aqueous extraction, 52
Rat feeding studies, effects of aflatoxins, 493
Reduction of linolenate, rate constants by computer, 429
Reduction rates relative, of fatty acid isomers by hydrazine, 323
Reflectance, in detergency testing, 70
—— as measure of cleaning efficiency, 351
Reflectance measure, of enzyme cleaning activity, 515
Refractive index, fats and oils, changes during autoxidation, 28
—— measure of lipid rancidity, 28
Resin acids, from tall oil, minor components, 633
Resinous polyol, reaction with polyaldehyde acetals, 455
Rheology of hematite slurries, effect of surfactants on, 642
Rhodamine 6G, as reagent in fatty acid micromethod, 473
Rhodium oxide, catalyst in hydrogenolysis of carboxylic acids, 119
Rosin, maleic anhydride adducts, 241
Ross-Miles foam test, 399

S

Safflower breeding, oil quality and quantity, 130
Safflower oil, high oleic, oxidative stability, 173
—— oxidative stability, 173
—— products from irradiation of, 387
Salmon, Lake Michigan coho, fatty acid comp, 428
Salmonella, ecology and food sources, 222
—— an enforcement problem, 225
—— humans and pets as sources, 230
—— method of destroying, 233
—— occurrence and transmittance, 227
—— Symposium, beginning on page 219
Salmonellosis, prevalence in humans and animals, 219
Sampling peanuts, for accurate aflatoxin dtmn, 377
Sampling variability, in peanut aflatoxin, 667, 678
Sebacic acid, diallyl and divinyl esters, 396
Secodehydroabietic acid, from tall oil fatty acids, 633
Sedimentation rates, effect of electrolytes on suspensions, 571

Seed coat, non-interference in cottonseed aflatoxin anal, 31
Sesame oil, brominated, methanolysis and GLC anal of, 558
Shark liver oil, hydrocarbons and alcohols in, 34
Sicklepod, fatty acid comp of leaves and stem, 47
Silica gels, variability, in TLC aflatoxin procedure, 335
Silicone, organo, in nonionic surfactants, 635
Siloxanes, dimethylpoly-, isolation from fatty foods and quantitative anal, 561
Silver/cadmium oleate, catalysts in reduction of oleic acid to oleyl alcohol, 163
Slurries, hematite, effect of surfactants on, 642
Soap and detergent raw materials, fatty acids and alcohols, 194
Soap, toilet, antibacterial and deodorant, 202
—— containing detergents, 202
Sodium alkyl sulfoacetates, prep and properties, 579
Sodium *p*- [1-(n-nonylthio) ethyl] benzene sulfonate, a biodegradable detergent, 601
Soft drinks, dtmn of brominated oils by GLC, 558
Soil removal, with alcohol sulfate containing detergents, 441
—— equated to energy input by calorimetry, 299
Soil, synthetic, for cleaning efficiency test, 351
—— containing protein, for wash tests, 357
Solids in fats, by differential scanning calorimetry, 341
Solubility, of barium caproate/water/propanol system, 588
Solubility data, by isopleth reference method, 583
Solvent extraction, of soybeans, 1944-1968 bibliography, 458A
Solvents, in soybean extraction, 1944-1968 bibliography, 458A
Sorbitan, fatty acid esters, TLC and GLC anal, 8
Sorbitan monostearate, dtmn of, 381
Sorbitol, dianhydro, 381
—— fatty acid esters, TLC and GLC anal, 8
—— mono fatty acid esters, 8
Sorbitol esters, of α-sulfopalmitate and α-sulfostearate, 549
Soybean oil, anal of Δ^{15} content in partially hydrogenated, 312
—— deodorized, method of tocopherol anal, 339
—— hydrogenated, removal of copper from, 498
—— hydrogenation, with copper-chromium catalysts, 662
—— hydrogenation to high oleic oils, 97
—— methyl esters, hydrogenation with homogeneous catalyst complexes, 256
—— nickel catalysts in partial hydrogenation, 139
—— partial hydrogenation, isomer distribution, 245
—— N-phenylaminomethylated, 611
—— products from irradiation of, 387
—— α-tocopherol derivatives, 18
—— in urethane polyesteramide resins, for coating resins, 360
Soybean oil processing, fate of added labeled hydrocarbons, 482
Soybeans, bibliography of solvent extraction, 1944-1968, 458A
—— soaking yields 1-octen-3-ol, 179
Soy flour, full fat, lipoxidase deactivation by heat treatments, 623
Soy milk flavors, 1-octen-3-ol, 179
Spectrophotometric method, for micelle concc in surfactants, 285
Squalene, in dogfish, cod and herring oils, 554
Stearic, α-sulfo-, hexitol and sucrose esters, 549
Stearic acid, dibromo methyl ester, partial dehydrobromination, 464
—— solubility in acetone, methanol, toluene, isopropyl ether, 583
Stearic acid/alcohol in monolayers, physical chemistry of, 645
Stearoaldehyde, synthesis from acid chloride, 277
γ-Stearolactone, from oleic acid, 479
Stearolic acid, 171
Sterculic acid, analytical methods and prep, 185
Sterculic acid and esters, HBr titration method, 654
9(10)(N-phenylaminomethyl) Stearyl amine, 611
Stilbene, *trans*-3,5-dimethoxy-, in tall oil fatty acids, 569
Storage of cottonseed, effect of temp on, 303
Structure, of triglycerides, prediction from FA comp, 421
Sucrose esters, of α-sulfopalmitate and α-sulfostearate, 549
Sulfhydryl compounds, in destruction of cyclopropenoid fatty acids in cottonseed meal, 305
Sulfoacetates, sodium alkyl, prep and properties of, 579
Sulfonates, alkyl, in foam testing, 399
—— *p*-[1-(n-nonylthio) ethyl] benzene-, sodium salt, 601
—— linear alkylbenzene, solubilization in hard water, 544
Sulfonation, of α-olefins, 208
α-Sulfopalmitate, hexitol and sucrose esters, 549
α-Sulfostearate, hexitol and sucrose esters, 549
Sulfur dioxide, in destruction of cyclopropenoid fatty acids in cottonseed meal, 305
Sulfurized nickel catalysts, in partial hydrogenation of vegetable oils, 139
Sunflower, wax esters, 505
Sunflower varieties, fatty acid distribution, 126
Surface pressure, in mixed fatty acid/alcohol monolayer, 645
Surface tension, of amine salts of dodecyloxy- and tetradecyloxy-propionic acid, 365
—— barium soap (water) propanol, 152
—— of N-lauroylethylenediamine metal chelates, 344
—— of organosilicone nonionic surfactants, 635
Surfactant properties, of sodium alkyl sulfoacetates, 579
—— of sugar esters of α-sulfopalmitic and stearic acids, 549
Surfactants, effect on hematite slurries, 642
—— effect on laundering of virus contaminated fabrics, 532
—— nonionic, biodegradability testing of, 432
—— nonionic, containing polysiloxanes, 635
—— nonionic, critical micelle conc dtmn, 285
—— osmotic pressure dtmn of micellar weights, 593
—— in petroleum oil recovery, 540A
Surfactant sorption and degradation, by algae, 604
Suspension stability, of solid particles, effect of electrolytes, 571
Synthesis of lipid components, method and example review, 145
Synthetic fatty acids, commercial scale, 194
—— new development, 4A
Synthetic fatty alcohols, commercial scale, 194
Synthetic fibers, treated with optical brighteners, 75

T

Tall oil fatty acids, *trans*-3,5-dimethoxystilbene in, 569
—— unusual resin acids, 633
Tallow, beef, fatty acid comp, 620
Temperature, effect on deterioration of stored cottonseed, 303
—— effect on GLC retention time, chain length and unsaturation, 5
Tertiary amines, cyclic, from N-chloro fatty amines, 391
Textile technology and detergent formulations, 199
Thin-layer chromatography. See chromatography, thin-layer
Thioglucosides, in rapeseed meal, 121
Thioglycollic acid, in destruction of cyclopropenoid fatty acids in cottonseed meal, 305
Tissue, chicken, assay for gossypol and metabolites, 100
Titanium dioxide, electrophoretic migration in phosphate solutions, 280
TLC. See chromatography, thin-layer
Tocols, anal procedure, 417
Tocopherols, anal procedure, 417
—— automated anal of, in soybean oil, 339
—— effects in polyunsaturated fat diets in rats, 563
—— rat dietary requirement in vegetable oils, 657
—— in safflower oil, 173
α-Tocopherol, dimeric oxidation product in soybean oil, 18
5-α- Tocopheroxy-α-tocopherol, 18
Tocotrienols, anal procedure, 417
Toilet soaps, 202
Toxicity reduction, of rapeseed meal aqueous extraction, 52
Treatment, biological, of waste water, 344A
—— physical and chemical, of waste water, 344A
3,4,5-Tribromosalicylanilide, identification of by TLC, 529
Trichloroacetic acid, in bioassay of detergents containing proteolytic enzymes, 81
3,4,4'-Trichlorocarbanolide, identification of by TLC, 529
1,2,3-tris-(triphenylphosphine)Trichlororhodium, a catalyst, 611
Tridecadienyl acetates, GLC of geometric isomers, 191
Triglyceraldehydes, reaction with styrene allyl alcohol copolymer, 455
Triglyceride composition, of lard by DTA, 385
Triglyceride oxidation, separation of azelaaldehydates, 632
Triglycerides, melting points of, 385
Triglyceride structure, calculated from FA comp, 421
Trilaurin, heat of fusion, 143
Trimyristin, heat of fusion, 143
Trinitrobenzene sulfonic acid, in bioassay of proteolytic enzymes, 511
Tripalmitin, heat of fusion, 143
Triphenylphosphine, a reagent in quantitative dtmn of Δ^{15}-unsaturated FA, 312
Tristearin, heat of fusion, 143
Tungsten tricarbonyl complexes, homogeneous hydrogenation catalyst, 256

U

Ultraviolet light, in screening cottonseed for aflatoxin, 39
N,N-Di-n-Undecylaniline, 611
Undecylenic acid, methyl ester, epoxidation of, 459
Unsaturated fatty acids, permanganate oxidation of, 685
trans-Unsaturation, in fats by infrared absorption, 552
Urethane-polyesteramides, for coatings, 360
Urethane polymers, air drying, from polyaldehyde acetals, 452
UV light. See ultraviolet light

V

Variability, of sampling peanuts for aflatoxin, 667, 678
Vegetable oils, brominated, dtmn by GLC, 558
—— dietary Vitamin E levels for rats, 657
Vernolic acid, glycerides, 108
Vernolic acid methyl ester, epoxidation of, 327
Vernonia anthelmintica seed oil, anal, 108
Vinyl activity, of brominated linseed oil, 464
Vinyl 11-allyloxyundecanoate, 396
5-Vinyl-2-oxazolidinethione, in rapeseed meal as thioglucoside, 121
Virucidal activity, on fabrics, 532
Virus control, on fabrics by chemical agents, 532
Viscosity, of barium caproate/water/propanol system, 588
Vitamin E, method of anal in food materials, 417
—— rat dietary requirement in vegetable oils, 657
Vitamin E requirements, in rat diets of varying FA/tocopherol ratios, 563

W

Washing machine equipment innovation, 205
Washing systems, soil removal equated to energy input, 299
Wash tests, with protein containing synthetic soil, 357
Waste water, biological, chemical and physical treatment, 344A
Waste water disposal, from oil/fatty acid plant, 344A
Water, effect of on catalysis and antioxidants in linoleate oxidation, 597
Water hardness, effect on solubilization of detergents, 544
Water treatment, disposal from oil/fatty acid plant, 344A
Wax esters, from sunflower oil, 505
Wetting ability, of organosilicone nonionic surfactants, 635
Whiteness control, in fibers treated with optical brighteners, 75
Whitening of polyesters, with fluorescent agents, 523

X—Y—Z

Yellowing, detergent effects on fabrics, 199
Zinc omadine, identification of by TLC, 529

COMMITTEES

Fats and Oils By-Products, Glycerine Analysis Subcommittee, 1969 report, 651A

Instrumental Techniques, report, 1967-1968, 57
—— 1969-1970, 602A

Referee Applications, first notice, 362A
—— second notice, 414A
Rheineck, A. E., named 1969 faculty lecturer at North Dakota State University, 83A
Roosevelt University, chemistry department receives $9,400 grant, 491A

S

Sao Paulo University, valuable nutrition studies underway, 527A
Sastry, M. C. Shamanthaka, N. Subramanian and R. Rajagopalan. Studies on the wet dehulling of sesame seed to obtain superior grade protein concentrate, 592A
Scofield, Francis. Book review—Advances in Macromolecular Chemistry, Vol. 1, edited by Pasika, 256A
Sections of AOCS, North Central Section, M. W. Formo speaks at meeting of Jan. 1969, 79A
—— to hold first meeting on Sept. 17, 1969, 558A
—— T. V. Kueper was speaker at meeting of Nov. 1969, 664A
—— photos of Bailey Award presentation to H. O. Olcott and March 1969 meeting, 316A
—— photos of May 1969 ladies night meeting, 406A
—— to present Bailey Award to H. S. Olcott, 85A
Northeast Section, call for nominations for section Achievement Award, 146A
—— to convene on Oct. 28, 1969 in Philadelphia, 558A
—— M. W. Formo speaks at Jan. 1969 meeting, 79A
—— to hold meeting on January 7, 1969, M. W. Formo to speak, 48A
—— last meeting of year held June, 1969, 362A
—— new officers announced and future meeting lectures announced, 484A
—— photos of April 1969 symposium, 318A
—— photos of meeting of March 1969, 264A
—— photos from meeting of Oct. 1969, 664A
—— presents Achievement Award to W. C. Ault, 260A
—— program for symposium to be held in April 1969, 142A
—— J. R. Ryberg to speak at final meeting of 1969, 202A
—— third achievement award honors Waldo C. Ault, 14A
Northern California Section, second meeting of year to be held in Sept. 1969, 484A
—— meeting of Nov. 22, 1968, 14A
Short Course, June, 1969, Indianapolis, Indiana, complete program, 154A
—— photos, 486A
—— sketches of organizers, 198A
—— **July, 1969, French Lick, Indiana,** complete program, 192A
final program and abstracts of papers, 248A
—— joint AOCS-AACC course entitled Oil Seed Proteins to be held in **French Lick, Indiana,** 95A
—— photos of committee members, 132A
—— **Sept. 1969, Hershey, Pa.,** final program, 404A
—— schedule, 296A
Shubik, Philippe. Book review—The Carcinogenic Action of Mineral Oils: A Chemical and Biological Study, 22A
Smalley Edible Fat Check Sample Series, now computerized, 490A
Smart, C. L. Book review—Reviews in Macromolecular Chemistry, Vol. 2, edited by Butler and O'Driscoll, 256A
Snyder, Fred. Book review—Advances in Chromatography, Vol. 7, edited by Giddings and Keller, 506A
Society of Cosmetic Chemists, announces scholarship grants, 656A
—— plan meeting for May, 1969, 140A
—— plan meeting for Nov. 1969, 262A
Sonntag, Norman O. V. New developments in synthetic fatty acids, 4A
—— H. Fineberg, H. Molteni, H. Zabel and E. S. Pattison. Panel discussion and symposium: Nonfood uses of coconut oil: Where are we headed?, 632A
Soybeans, cheese-like food from, 491A
Spanish Society of Cosmetic Chemists, to hold IFSCC Congress in Barcelona in Sept. 1970, 370A
Speel, Henry C. Book review—The Chemistry of Imidoyl Halides, by Ulrich, 506A
Stillman, R. C., biographical sketch of AOCS Past President, 84A
Subramanian, N. See M. C. Shamanthaka Sastry
Swern, Daniel. Book review—Autoxidation of Hydrocarbons and Polyolefins: Kinetics and Mechanisms, by Reich and Stivala, 326A

T

Tall oil fatty acid report, 48A
Teeter, H. M. Book review—Organic Chemistry Problems, by Busby and Shaw, 78A
Texas A & M University, proposes investigation of protein foods from non-meat sources to combat world food shortages, 271A
Treasurer's Report, April 1969, 358A

V

Vander Wal, R. J., retires from Armour and Company, 154A
Vivian, Virginia M. Book review—Dietetic Foods, by Bender, 78A

W

Washington University, to conduct 2 short courses with the American Chemical Society, 552A
Water pollution control, British experts to visit U.S., 527A
—— specialists join forces to form Marine Pollution Control Associates, 556A
—— symposium planned for future meeting of AOCS, 370A
Weisberg, S. M. Editorial—The Staff of Life, 615A
Wolff, I. A., to head utilization research at USDA's eastern division, 484A
Wrigley, Arthur N. Book review—Acetylenic Compounds: Preparation and Substitution Reactions, by Rutledge, 148A

X—Y—Z

Zabel, H. See N. O. V. Sonntag
Zech, John D. Book review—Reviews in Macromolecular Chemistry, Vol. 1, edited by Butler and O'Driscoll, 12A
Zilch, Karl T. Book review—Fatty acids: Their Chemistry, Properties, Production and Uses, Second Edtion, Part 5, edited by Markley, 324A
